**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 September 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/30/06 has been entered.

### ***Terminal Disclaimer***

2. The terminal disclaimer filed on 8/30/06 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent issued to 10/680,807 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended the claim to include "said object

Art Unit: 1731

functioning to hold the shape and moisture of the tobacco paper", yet there appears to be no support in the written specification for this recitation. It is assumed that Applicant intended to claim that the enveloping means functions to hold the moisture of the tobacco paper in said rolled form. This is how the claim will be interpreted for examining purposes.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This claim recites the limitation "said cylindrical object" in line

1. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Objections***

7. Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The subject matter of claim 11 is already stated in claim 8.

8. Claim 8 objected to because of the following informalities: The recitation "a container means for shipping the cigar tobacco paper to a consumer" should be deleted as it is already stated in claim 1 – from which claim 8 depends. Appropriate correction is requested.

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sinclair, Jr (US. Pat. No. 6,742,525).

Sinclair, Jr. discloses nearly all that is recited in the claims since it teaches, as depicted in Fig. 26, rolled homogenized tobacco or tobacco leaf sheets – formed as shaped tubes 80 enclosed in an aluminum or plastic zip-wrapper 164 (corresponding to the claimed “enveloping means” since the zip-type enclosure which functions to keep moisture in the tubes), which are then packaged in a box 167 (corresponding to the claimed “containing means”) for shipping the shaped tubes 80. Sinclair, Jr. discloses that split tube 78 can be packaged in zip-wrapper 164, so it follows that one having ordinary skill in the art would package shaped tube 80 with split tube 78, as shown in Fig. 21, so that the shaped-tube 80 will be ensured to maintain its tubular shape during shipping. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided for a plastic box 167, since plastic is such a common packaging material in many arts – and would be capable of maintaining an airtight and watertight seal.
